1. We will take a look at each of the different time periods above and analyze how the Media influenced the outcome for history.
2. Your **PROJECT** will be to find one topic in history (must be specific) and research the person/event. Once you have background knowledge on the subject, you will write a 5 separate news articles. Each news article will be written using a different style based on exaggeration, **exposure**, **influence**, **scandal driven** and **Viral Seeking**.
3. There are several ways to complete this task. I have attached a possible idea for you to use <https://www.makemynewspaper.com/free-newspaper-templates>
  - Make sure you use an image that represents the topic (change for each of the 5 newspaper styles)
  - Additional spots on the newspaper must have something historical from the time (ex..events happening during the time, social issues or economical issues)
  - You **MUST** create 5 different newspapers
  - You **MUST** sign in to the account in order to save
  - IF you do not use the [www.makemynewspaper.com](http://www.makemynewspaper.com) site, you will need to make sure that the app/webpage allows you to create a “newspaper” style piece.
