

Let's look at immigration through your lens. You can widen or tighten your lens as much as you need to complete the assignment.

1. **1st, 3rd and 6th period.** Find an immigrant from the last 140 years that has impacted your lens in the United States. In other words, he or she had to have moved here and had his or her impact, not have done whatever they did in their home country, then just moved here.
2. **1st, 3rd and 6th period.** Create a one slide biography that you can present on Thursday (30 seconds). The slide should contain: Name of immigrant, home country, when they immigrated, what was their impact (this could be 2-3 bullet points—but you can tell us more).
3. **1st and 3rd periods**—write 250 words (1 page) explaining the social, political, and/or economic impact that this person had on the United States (It could be 1, 2, or 3 of those impacts, depending on who you pick and what they did—but try to find all 3 if you can). I do not want their biography here, just the impact that they had on the US.
4. **6th period**—write 125 words (half a page) on the social, political, or economic impact that your person had. This is not their biography, but their impact on the US.

All of this should be completed by the **beginning of class on Thursday**. Remind me or message through schoology if you have question.
