

Innovation Deep Dive

Pick one of the innovations (transportation, communication, industrial) that we've studied over the last 3 weeks.

Now, pick the decade (1880s-2010s) in which you think that the innovation you have chosen had the greatest impact (economic, social, political). You may have to research before you make this decision.

Include in your research all the relevant historical events of that decade and what impact your innovation had on those events.

Create anything you want that will show off the impact of your innovation.

You have 4 school days to work on this.
